

KRUSHNA MALI

AI Product Engineer | AI-Assisted Software Development | Mobile & Web Applications

Pune, Maharashtra, India · Open to Remote | github.com/krishna19d | krishna19d.github.io/portfolio | Live app: Facethetic AI (Google Play)

PROFESSIONAL SUMMARY

AI-native product builder who independently designed, built, and shipped a live Android app (Facethetic AI, on Google Play) and is building a second AI product (Conviq AI), using AI-assisted workflows across the full lifecycle: architecture, implementation, debugging, deployment, and monetization. Hands-on with Flutter, Firebase, ML Kit/TensorFlow Lite, and LLM APIs (Gemini, Claude, OpenAI). Currently deepening Python, SQL, REST APIs, React/Node.js, Docker, and cloud fundamentals to move from product builder into production AI/software engineer.

TECHNICAL SKILLS

AI & LLM: Prompt Engineering, LLM Application Dev, Claude, Gemini, OpenAI APIs, AI-Assisted Development; Learning: AI Agents, RAG, Vector DBs, Function Calling

Programming: Dart/Flutter (Hands-on); Learning: Python, JavaScript/TypeScript, SQL/PostgreSQL; HTML/CSS (Working Knowledge)

Backend, Cloud & Data: REST APIs, Firebase/Firestore, Cloud Functions, Google Play Console (Hands-on); Learning: FastAPI, Node.js, PostgreSQL, GCP, Docker, CI/CD

Mobile, Tools & Product: Flutter/Android Dev (Hands-on); React/Next.js (Learning); Claude Code, ChatGPT, Copilot, Git/GitHub; MVP Dev, App Monetization, Testing & Debugging

PROFESSIONAL EXPERIENCE

Founder & Developer — AI Products | Independent / Self-Directed | 2025 – Present

- Independently architected, built, and shipped Facethetic AI, a production Android app live on Google Play, owning the full lifecycle from idea through deployment and monetization.
- Used AI-assisted development tools (Claude, ChatGPT, Gemini, Copilot) as core engineering partners for architecture, implementation, debugging, and iteration on production code.
- Diagnosed and fixed production defects in scoring logic and cloud backend configuration; designing Conviq AI, a second LLM-based product with subscription monetization.

Civil Site Engineer | India | Current

- Manage technical coordination and documentation on live project sites while self-directing a parallel transition into AI/software product development.

SELECTED AI / PRODUCT PROJECTS

Facethetic AI (formerly LookMaxPro) — Live on Google Play · Flutter, Firebase, ML Kit, MediaPipe, TFLite

- Built a landmark-based AI face-scoring engine (MediaPipe 468-point mesh + TFLite), with Firebase auth, cloud storage, analytics, and a free/premium monetization model via Google Play Billing.

Conviq AI — In development · Flutter, Firebase, Gemini API, Cloud Functions

- Architecting an AI communication-coaching app with real-time LLM conversation across interview, dating, fluency, and confidence modes; designed subscription and usage-limit strategy.

EDUCATION

B.Tech, Civil Engineering — R. C. Patel Institute of Technology, Shirpur · 2025

CURRENTLY BUILDING PROFICIENCY IN

Python → SQL/PostgreSQL → FastAPI → REST APIs → Docker → Cloud (GCP) → LLM APIs → RAG → Vector Databases → AI Agents → React/Next.js
